

## Opening of Package Testing Laboratory at Irish Headquarters

SteriPack, the global leader in manufacturing medical packaging solutions, have just announced the opening of its in-house testing laboratory, providing package testing services to facilitate its growing customer base worldwide. This new opening is a significant step to expand SteriPack's operation and demonstrates its deep commitment to the needs of their clients.

SteriPack's Laboratory conducts its testing at their Headquarters in Ireland which has been designed and equipped with the most up-to-date technology. Services available include Bendtsen, Transportation and Altitude testing. Materials can be analysed using Gelbo Flex testing and the latest in FT-IR scanner technology.

"Expanding into Package testing services enables us to continue to deliver on our strong reputation of providing quality work and customer service to our growing client base and is a tremendous boost to SteriPack's production capabilities," commented Barry Moore, Group Sales Director.

*SteriPack Group is a global leader in providing cleanroom medical packaging solutions worldwide. Founded in Ireland in 1994 the company has expanded their manufacturing facilities to Poland & Malaysia. SteriPacks sales offices are strategically located in the USA, France, UK, Tunisia, India, China, Germany, Netherlands, Spain and Italy.*
