Gusset Bags have arrived

SteriPack have now added Gusset Bags to their broad range of packaging products. The Gusset bags can be manufactured as a base gusset or side gusset pouch made from laminate materials such as PET/PE and PA/PE materials.

The Gusset bags have sides that expand allowing you to package large bulky items. Cap/nozzles can be sealed into base gusset and standard pouches which are used to package and dispense liquid products.

FTIR AND DSC Testing now available.

SteriPack Laboratories new 90sqm testing facility offers a comprehensive range of services providing support to your package testing and validation

requirements.

We have recently extended our test capability.

For materials analysis we now have DSC and FTIR test equipment.

For transportation testing we have compression testing, drop testing and conditioning chambers which cycle from subzero to elevated temperatures and can be used to test to ISTA transportation test requirements.
