More new Testing Capabilities available at SteriPack's Test Laboratory

SteriPack Laboratory Ltd have passed their six month interim accreditation audit in January 2011 for ISO17025. As part of this audit process we have applied to extend it's scope of accredited tests to include:

Transport Distribution Testing:
Compression Testing - ASTM D642 & ASTM D4577
Drop Testing - ASTM D5276

The associated Conditioning and Vibration testing required by ISTA 1A and ISTA 2A are already part of the lab capability.

Functional Packaging Tests such as Burst Testing (ASTM F1140-07) and Bubble Leak Tests (ASTM F2096) and polymer analytical tests such as FTIR Spectroscopy (ASTM E 1252 and ASTM E 573) and DSC Analysis (ISO-11357-1-2009).

Accreditation for these new test methods is expected to be granted following INAB Board approval in April.
