### New Extension Ireland

SteriPack's Headquarters at Clara, Co. Offaly, Ireland has recently being expanded. The newly expanded facility is fully operational and is part of SteriPack's ongoing commitment to continuously improve the services it provides to its growing number of customers.

As well as Ireland, our facilities in Poland and Malaysia are growing from strength to strength as well as expanding into new markets like USA, India and China.

### SteriPack Re-Branded

SteriPack has recently unveiled, the newly re-branded logotype identity of their Corporate Image. The logo is now illustrated in a cool blue, alongside a navy blue dot.

Common branding for Ireland, Poland & Malaysia under the new re-branded SteriPack logotype has been a result of the global unification activities of all facilities belonging to the SteriPack Group with the main purpose to strengthen and unify our presence on the international arena.

Presently, within a framework of SteriPack Groups core competence, we have defined two strategic fields of action:

- Medical Packaging
- Contract Manufacturing Services for the Medical Industry

### Upcoming Tradeshows

For the first time, SteriPack is exhibiting as a Group, showing the capabilities of our three facilities Ireland, Poland & Malaysia.

SteriPack Group will exhibit at a number of tradeshow events in the coming months and welcome all visitors to meet with us:

## **Tradeshow Calendar**

- Medtec China 8th - 10th September 2009 **Stand No. 807**
- Medtec Ireland 23rd -24th September 2009 **Stand No. 230**

- Medtec UK 27th - 28th April 2010 **Stand No. 203**
- Medtec Japan 15th-16th April 2010 **Stand No. 628**

## **New Product Launched**

SteriPack have recently invested in equipment to assemble Wickets on standard headerbags. The Wicket Bag will allow our customers to take multiples of bags on wicket sets and insert them into automatic filling and sealing equipment. The bags are removed from the Wicket using a pre perforated slot and subsequently filled and sealed. This has the advantages of faster production cycling, increased output and reduced labour for our end-users. The hole punching and perforation system is a state of the art process, which individually controls the positioning of each hole and perforation to minute tolerances. The Wicket Bag designs can be customised to individual customer requirements following review with our Sales and Technical teams.
